SUMMARY

Computer Engineering graduate with project experience developing Java desktop applications and full-stack web systems. Built account, service-booking, and inventory workflows using Java, React, Node.js, and PostgreSQL. Seeking a junior software development role focused on application and backend development.

PROJECTS

CASH-G BANKING APP | Final Project | Java, Swing, JDBC, PostgreSQL, JUnit 2026
GitHub: github.com/vmargin/banking-app

- Developed a Java banking simulator with registration, PIN login, cash-in, transfers, and transaction history, bringing account operations into one desktop workflow.
- Implemented JDBC transactions for balance changes and paired transaction records, allowing transfers to commit together or roll back on failure.
- Organized feature delivery through GitHub issues, acceptance criteria, and JUnit checks, linking application rules to defined tasks and repeatable tests.

ARCTIC - AIRCON SERVICE MANAGER | Client Project | TypeScript, React, Express, Prisma, PostgreSQL 2026
GitHub: github.com/vmargin/aircon-service

- Gathered requirements from a four-branch air-conditioning company and mapped its booking-to-invoice workflow, translating staff operations into system requirements.
- Defined organization and branch access requirements, booking transitions, and payment rules, giving implementation explicit rules for staff scope and job progression.
- Led requirements, data-model design, and deployment work with AI-assisted implementation, translating the service workflow into booking, invoice, and audit-log features.

MULTI-TENANT ASSET MANAGER | Personal Project | React, Express, Prisma, PostgreSQL 2026
GitHub: github.com/vmargin/multi-tenant-asset-manager

- Developed organization-scoped asset queries and writes, applying organization identifiers to listing, update, and delete operations.
- Modeled organizations, users, assets, and categories with PostgreSQL constraints and Prisma migrations, defining relationships and a repeatable database setup.
- Configured the React frontend, Express API, and PostgreSQL database for local and hosted environments, supporting development and deployment from the same project.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, SQL, HTML, CSS
Frontend: React, Vite, Tailwind CSS, TanStack Query
Backend: Node.js, Express, REST APIs, JWT, bcrypt, Zod
Database: PostgreSQL, Prisma ORM, JDBC, Supabase, Database Migrations
Testing & Build: JUnit, Maven, Jest
Tools & Deployment: Git, GitHub, Docker, Vercel, Postman, pgAdmin

EDUCATION AND TRAINING

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES
Sta. Mesa, Manila
BS Computer Engineering | 2020
Relevant Coursework: Object-Oriented Programming, Data Structures and Algorithms, Relational Database Management, Software Engineering

JAVA PROGRAMMING NC III TRAINING - TESDA | Completed 2026
CIICC, Quezon City

AWS CLOUD QUEST: CLOUD PRACTITIONER | Completed 2026
Course completion
