SUMMARY

Computer Engineering graduate with project experience developing Java desktop applications and full-stack web systems. Built account, service-booking, and inventory workflows using Java, React, Node.js, and PostgreSQL. Seeking a junior software development role focused on application and backend development.

PROJECTS

CASH-G BANKING APP

Final project | Java, Swing, JDBC, PostgreSQL, JUnit | github.com/vmargin/banking-app

- Developed a Java banking simulator with registration, PIN login, cash-in, transfers, and transaction history.
- Implemented JDBC transactions so balance changes and paired transfer records commit together or roll back on failure.
- Organized delivery through GitHub issues, acceptance criteria, and JUnit checks tied to application rules.

ARCTIC - AIRCON SERVICE MANAGER

Client project | TypeScript, React, Express, Prisma, PostgreSQL | github.com/vmargin/aircon-service

- Gathered requirements from a four-branch air-conditioning company and mapped its booking-to-invoice workflow.
- Defined organization and branch access requirements, booking transitions, payment rules, and the relational data model.
- Led requirements, data-model design, and deployment work with AI-assisted implementation.

MULTI-TENANT ASSET MANAGER

Personal project | React, Express, Prisma, PostgreSQL | github.com/vmargin/multi-tenant-asset-manager

- Applied organization identifiers to asset listing, update, and delete operations.
- Modeled organizations, users, assets, and categories with PostgreSQL constraints and Prisma migrations.
- Configured the frontend, API, and database for local and hosted environments.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, SQL, HTML, CSS
